MAIN DRIVEWAYS IN NEW CEMETERY ARE NOW PAVED

Great Improvement Made at New Maysville Cemetery By Paving All Main Driveways-Lots Being Leveled.

The officers of the New Maysville Cemetery have just completed one of the biggest improvements made in our cemetery with concrete.

The work was done under the di- trap drummer. rection of Mr. W. H. Cox, who takes a special interest in seeing that the the company's finances can make it.

The erection of a new fence about the cemetery and the building of the very imposing entrance was only the beginning of a series of improvements ability. in the minds of the officials of the company and the completion of these paved driveways is only another step in reaching the goal the officials have their selections with finesse that

The next step to be taken by the officials will probably be the building of a beautiful Chapel. The erection of WILLIAM CHANSLOR'S this chapel the officials have had in mind for some time and they were anxious that it be erected this year but were unable to get the work done properly. It was postponed until next year and, so anxious are the officers of the company to get the building erected, that they expect to erect it themselves if they are unable to get the contractors on the job. This chapel will be erected on the beautiful site just east of the soldiers' and sailors' monument, which has been reserved for this very purpose. It will be for the use of all who desire to hold services at the cemetery.

Building of this system of paved driveways through the cemetery has added much to the beauty of the cemetery and they will be found to be a wonderful improvement in bad

weather. City and county officials should now take some steps toward paving Carmel street and the Mt. Carmol pike from the end of Carmel street to the cemetery entrance. The paving of this street and small stretch of roadway would give the public a paved driveway from the city direct to the grave

DEATH THREAT PREVENTS MOVE TO EXHUME BODY

Governor May Be Asked to Investigate Case in Kentucky Hills of Death and Burial of Missing Woman.

Cincinnati, July 25.-Mesengers sent recently to Webbville, Ky., by Carl Schuett, Jr., of ths city, to investigate the death of a woman who had been identified as Mrs. Will Fiscus, Cincinnati woman, were ordered to leave the vicinity by a mountaineer, who threatened to kill him if they did not desist in their efforts to have the body exhumed. Schuett declares.

Schuett says he married the woman at Batavia, Ohio, in Ocotber, 1917, but was told afterward that she had not been divorced from her first husband. She disappeared fifteen months ago, he said, and recently he learned that she went to Kentucky with the man who a few days ago threatened to kill the Cincinnatians who tried to exhume the body.

Residents at Webbville said the woman committed suicide by taking poison tablets which were purchased in Cincinnati before she left this city. The woman had been known only as "Anna May." during her stay in Jean. Ky., a little settlement near Webbville. Schuett said he intended asking Governor Morrow of Kentucky, to investigate the affair.

Road Engineer With Reputation of Being Best In State Looks Over Mason's Highway System to Advise What Is Needed.

Road Engineer Edwards, of Fayette and Woodford counties ,accompanied by 'Squire Fister and Mr. Crutcher, also of Lexington, motored to Maysville Tuesday afternoon and spent all of Wednesday with Commissioner Furlong and County Road Engineer Collis, inspecting the entire system of oads in Mason county.

Mr. Edwards, who is regarded as the most efficient road engineer in the state, was invited to visit Mason county, make a thorough inspection of our nighway system and recommend action to be taken by the county whereby we can transfer our road system o the state highway department.

Mr. Edwards has been highly sucessful in the two counties he serves n getting the state road department o take over roads he has constructed as parts of the state highway system nd it is the purpose of the Mason County Commissioners to follow Mr. Edward's suggestions and get the Maon county roads in such condition hat the state will accept them and maintain them in the future.

The expert will make his recomendations today to Commissioner urlong and Road Engineer Collis, who will in turn report these recomendations to the Fiscal Court at the ext session of that body.

Washington, July 26. - Acceleration of coal distribution under Federal authority and control of fuel distribution were given by Administration spokesmen Tuesday as fundamentals of the ice cream factory of their own. The Government's policy toward the industrial crisis.

Restatement of the Government's position followed the regular Tuesday meeting of the Cabinet, which for nearly three hours devoted its attention to the double threat against the country's economic fabric-famine in fuel and disruption of interstate com-

The first step toward control of depleted tarnsportation facilities and oal supply came shortly afterward in statement from the Interstate Comnerce Commission, declaring that an emergency existed in the territory east of the Mississippi which required the commission to direct the routing of all essential commodities and to fix preference and priority status to control movement of food and fuel.

PARTY POLITICS IN COUNCIL

We are advised by an exchange that every year the Civic League of Cleveland, Ohio, gives the councilmen of that city the once-over and reports their faults and their merits. Among the merits the League credits to them in a recent report is this: "Party influence sheep off feed for 12 hours before has not controlled Council action.'

Our Cincinnati exchange from whom we obtain this information proceeds editorially to lament the control of the Cincinnati Council

The Maysville City Council comes in for much just criticism frequently but we can truthfully say with the Cleveland Civic League that "Party influence has not controlled Council action." We are of the opinion that not once, since the election of the present Maysville City Council, has party politics had any influence whatever to do with actions of council and for this we should be thankful.

Unto the present City Council is due the credit for acting on all the many matters that come before them, without the least hint of party politics playing even the slightest part. It should be such as every Councilman is elected independent of party affiliation and party politics should never be allowed to creep into city affairs.

ENOUGH FOOD, BUT DIVERTED

According to some reports, there is to be a big harvest of foodstuffs in Russia this year, amply sufficient to feed the population if it is properly distributed. Improper distribution and conservation was one of the principal causes of the recent famine. The soviety government confiscated much of the fod in the form of a tax, and a great deal of it was used to feed huge armies while the peasants who raised it were permitted to starve. The soviet theories of government are as destructive of agriculture as they are of any other private enterprise, and until they undergo a change the food problem in Russia will probably persist.

What will the importers have to say to that paper for trying to kill their

C. L. MAINS & CO. Distributors MINERVA, KY. STOMACH WORMS CAUSE DEATH OF MANY SHEEP.

Lexington, Ky. - Stomach worms this summer are causing heavy losses in many Kentucky sheep flocks, according to inquiries as to the best method of treatment which are being received at the College of Agriculture from farmers in different sections of he state. One farmer has reported the the loss of a dozen lambs while another who wished to know what to do for th trouble stated that he not only had lost lambs but also ewes.

Although rotation of pastures is a preventive measure, drenching with copper sulphate, commonly known as bluestone, must be resorted to after in charge of sheep work at the college. One-fourth of a pound of the pulverized material is dissolved in a pint of boiling water and enough water added to make three gallons. This is sufficient to drench 100 animals, each mature shep being given three and one-half ounces or seven level teaspoonbuls. Lambs receive half this amount. It is necessary to keep the drenching and care also should be taken not to tsarngle them while the drench is being given.

Rotation of pastures has proved its value as a preventive measure in trials conducted on the Kentucky Agricultural Experiment Station farm. Wherever possible lambs and ewes

There's just no counting on Nature. She chooses the most unexpected places and occasions in the world to assert her power. You'd never think if there were any place in which you would be removed from her vagaries it would be in such a one as the Cafe des Beaux Atrs. But the other day, the diners were starled to see some tiles suddenly leap into the air from the middle of the floor and them a stream of water spout to the ceiling. Patrons and waiters were drenched. Of course. it was assumed a pipe was broken. But no. It was just that a spring had at one time gushed forth at the place and after all these years of stifling civilization had decided to gush once more. -NY-

Now pajamas are considerably closer to a mans regular clothes than is a bathing suit, surely. So after all, why should there have been such commotion whe na bather appeared on the teach at Breezy Point last Sunday, attired in his best suit of that wear? He says he can't understand it, anyway. He wore them just because they do cover one so much better than a swimming costume, and while his motive was the avoidance of sunburn, he thinks it ought to meet equally well the respectability motive or the authorities. A soft white hat topped his costume and until the startled onlookers discovered what his clothes really ere, they though a Beau Brummel rom Central America had come

RAPE-NUTS is a regular "three O bags fuli" of the best food qualities of whole wheat flour and malted barley, carefully mixed and slowly baked-

To develop all their appetizing flavor,

To preserve all their wholesomeness,

And to provide nature's "broom" that keeps the digestive system spick and span.

There's not a bit of artificial sweetening in Grape-Nuts -it just becomes sweet of its own accord in the long baking.

And that enticing flavor-how good it is with good milk or cream! Fruits, too, fresh or cooked, add to the delight of a dish of Grape-Nuts, morning, noon or sundown.

It is a compact, ready-to-eat food-no cooking needed. Why not try it for tomorrow's breakfast?

The Lexington Herald has the following to say of John "Rasty" Wright who it seems has become dissatisfied at Winchester when interest in club early stage of the season desired to af-

that John ("Rasty") Wright of Irvine, formerly with the Winchester Dodgers, would be on the payroll of the Lexington team of the Bluegrass league within the next few weeks. Rasty, it is understood, has requested and received his release from the Winchester organization and there are strong hopes among local fans and players that the smoky portsider will soon be seen at work on Devereaux

"So far as batting averages are concerned, Rasty is, perhaps, the most destructive twirler in the Bluegrass especially, has nearly always been helpless before the youthful Estill county southpaw.

Winchester, Ky., July 25. - Formation of a stock company to buy the franchise of the Winchester club of the Bluegrass League from J. S. Baskett, of Cynthiana, was discussed at a meeting held a t the Chamber of Commerce this morning. A temporary organization was formed, and another meeting was scheduled for Wednesday morning, at which it is hoped to work out plans for the new company.

W. B. Lindsey is president of the temporary organization, Woodson Moss vice president and Dalas Lawrence secretary and treasurer. The present plan is to have the company incorporated for \$3,000, selling 300 shares at \$10 apiece.

Mr. Baskett has expressed his willingness to dispose of the club.
